

Cephalopod Z Chromosome Dosage Compensation:
Methylation-Anchored SXL-Zmast Bistable Switch Model

MALE (ZZ)

FEMALE (ZO)

STAT5B: constitutive (8/8 spp) | SXL: 99.8th %ile poly(U) | Zmast: 3.4-4.5x enriched sponge | MSL2: 0 poly(U) tracts | DNA methylation: gene body 5mC anchors Z targeting | MBD4: padj=0.039 F-biased

Arrows: -> activation, -[inhibition | Bold border = active | Grey = inactive/degraded | ~300 MY conservation across 8 cephalopod species
